

GUIDE TO Non-Surgical Facial Rejuvenation

Quick facts about non-surgical facial rejuvenation

- » Options to smooth wrinkles, restore volume, tighten sagging skin, improve skin tone & texture, minimize scars, treat sun damage & more
- » Less dramatic results than surgery, but little to no downtime
- » Most treatments are done in-office in 90 minutes or less
- » Results are typically temporary and last 3 months to 1 year or longer, depending on treatment

How can non-surgical treatments improve my face & skin?

WHEN IS FACIAL COSMETIC SURGERY A BETTER OPTION?

- » You have significant jowling, sagging skin, or volume loss to address
- » You prefer to undergo a procedure only once to achieve your final results
- » You desire a more permanent solution (cosmetic surgery can last for years)
- » You would like to reshape the nose, jawline or other facial features
